— A MESSAGE FROM THE PRESIDENT

**Louie A. Cansino**

PRESIDENT

Twenty years of keeping Philippine industry flowing.

When we founded Flowtork in 2004, we set out to do one thing exceptionally well — bring the world's best flow-control and instrumentation technology to the Philippines, and stand behind it long after the sale.

Two decades on, that promise still defines us. We have grown from a small actuator specialist into the authorized partner of eleven leading global manufacturers, serving water utilities, power producers, refineries and process plants across the country.

What has not changed is our belief that equipment is only as good as the people who specify, install and maintain it. Our engineers size every solution to your exact duty, our crews commission it on site, and our after-sales team keeps it running for years.

To our clients, principals and team — thank you for your trust. We look forward to keeping your operations flowing for the decades ahead.

— ESTABLISHED 2004 • FILIPINO-OWNED

A trusted partner for Philippine industry

Flowtork Technologies Corporation is a proudly Filipino-owned company established in 2004, specializing in the supply and installation of industrial instrumentation equipment across a wide range of industries in the Philippines.

Known for world-class products, reliable service and timely delivery, we have built a strong reputation over two decades — and continue to expand our team of skilled professionals while maintaining our leadership in product servicing and after-sales support.

Filipino-owned

Our Vision

To be a leader in process instrumentation — focusing on growth, profitability and resource optimization while ensuring quality, innovation and exceptional after-sales service, contributing to the betterment of every Filipino.

Our Mission

To deliver high-quality process instrumentation solutions with excellence and innovation — upholding the highest industry standards and a commitment to 100% customer satisfaction backed by continuous after-sales support.

— WHAT WE DO

Six product lines, one accountable partner

Flowtork supplies, installs and supports flow-control and instrumentation equipment across six product lines — each backed by world-leading principals and our own field engineering teams. Full detail lives in our product catalogue.

01.

ACT · Auma | Bray

Actuators & Gearboxes

Electric and pneumatic actuators plus valve gearboxes — the automation that moves your valves.

02.

VLV · Bray | VAG | Mascot

Valves

Butterfly, ball, knife-gate, check, control and sluice valves for isolation and regulation.

03.

FLO · Flowtronic | BadgerMeter | Ashridge

Flowmeters & Data Loggers

Electromagnetic and ultrasonic metering, open-channel measurement and IoT telemetry.

04.

AGM · Ekato

Agitators, Mixers & Seals

EKATO mixing technology, vacuum processing units and mechanical seals.

05.

FDR · Merrick

Weigh Belt & Coal Feeders

Merrick belt scales and gravimetric feeders for power and bulk-material handling.

06.

MLA · Technip Energies

Marine Loading Systems

Marine loading arms for fluid transfer and optical inspection systems for security printing.

— PRINCIPAL BRANDS

The manufacturers we represent

Flowtork is the authorized distributor and service partner for eleven of the world's leading instrumentation and flow-control manufacturers.

AUMA ELECTRIC ACTUATORS & GEARBOXES
German manufacturer of electric actuators for 60+ years.
Flowtork's authorized distributor since 2004.

KVA AIR MOTOR-OPERATED VALVE ACTUATORS
South Korean specialist in advanced valve automation (Cheongju-si) — we carry their Air Motor Operated Valve (AOV) actuators.

Bray FLOW CONTROL & AUTOMATION
Premier manufacturer of flow-control and automation products, operating in 40+ countries.

VAG WATER & WASTEWATER VALVES
Founded 1872 in Mannheim — a global player engineered for water and wastewater networks.

Mascot PROCESS CONTROL VALVES
Cutting-edge control-valve solutions engineered for diverse and demanding process needs.

Flow-Tronic LIQUID FLOW MEASUREMENT
Belgian innovator (est. 1989) in accurate open-channel and full-pipe flow instrumentation.

Badger Meter FLOW MEASUREMENT & WATER QUALITY
Innovator in flow measurement, water quality and control for utilities and industry worldwide.

Ashridge RUGGED IP68 DATA LOGGERS
Rugged, waterproof data loggers with long battery life and remote telemetry options.

EKATO MIXING TECHNOLOGY
Global leader in mixing technology, vacuum processing, hydrogenation and mechanical seals.

Merrick WEIGHING & FEEDING SYSTEMS
Over 110 years engineering precision weighing and feeding for demanding bulk-material duty.

Technip Energies MARINE LOADING SYSTEMS
Offshore and LNG leader (formerly FMC Technologies) in fluid transfer and loading systems.

Four service lines. One accountable partner.

Mechanical, electrical, instrumentation and technical support services — delivered on site by one responsive team across the Philippines.

SERVICE 01

Mechanical

Full-scope mechanical works — from valves, piping and actuators through fire protection, linings and turn-key fabrication — installed and maintained on site.

- ✓ Valve supply, installation, repair & retrofitting
- ✓ Piping systems — flanges, elbows & fittings
- ✓ Pneumatic & electric actuators — supply to PM
- ✓ Coal feeder maintenance & retrofitting
- ✓ Rubber & FRP linings
- ✓ Fire protection systems & pump capacity testing
- ✓ Sluice gates, stop logs & trash racks
- ✓ Steel ladders, cages & guide railings
- ✓ Turn-key projects & after-sales operation

SERVICE 02

Electrical

End-to-end electrical works — design and power distribution through to industrial controls, SCADA automation and system integration.

- ✓ Electrical design & layout
- ✓ Cable tray, conduit, raceway & cable pulling
- ✓ Industrial panel design, build & termination
- ✓ Surge protection, busway, transformers & grounding
- ✓ SCADA, automation & system integration

SERVICE 03

Instrumentation

Calibration, configuration and integration of measurement and control instruments across your process lines.

- ✓ Calibration & configuration
- ✓ Flowmeter verification
- ✓ Control-loop integration
- ✓ Data-logger setup

SERVICE 04

Technical Support

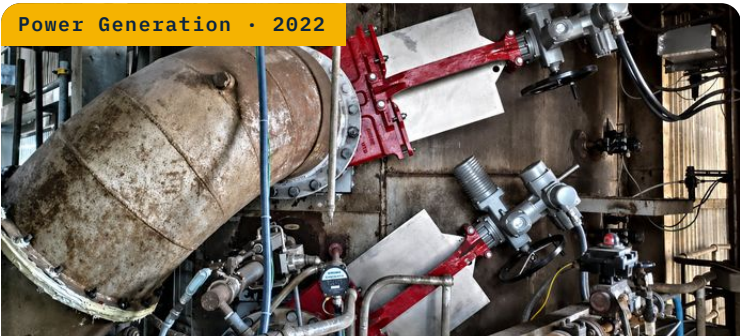

Responsive after-sales service, genuine spare parts and on-site troubleshooting — long after the order ships.

- ✓ After-sales support
- ✓ Genuine spare parts
- ✓ On-site troubleshooting
- ✓ Product training
- ✓ Operator training & turnover

— TRACK RECORD

Proven on Philippine sites

A selection of installation, commissioning and maintenance work delivered by our own engineers and field crews on Philippine power and water sites.

CASE STUDY 01

24 × AUMA-actuated DN600 knife gate valves

Client: Coal-Fired Power Plant

Dismantling and removal of existing valve assemblies, fabrication and welding of new standard mating flanges, installation and alignment of new AUMA-actuated DN600 Bray knife gate valves, and full testing and commissioning to verify proper operation and performance.

24 sets **AUMA + Bray** **Turn-key**
DN600 VALVES BRANDS SITC SCOPE

CASE STUDY 02

Large-diameter valves & insertion flowmeters

Client: Water Treatment Plant

Supply and installation of large-diameter flow-control and measurement equipment — an AUMA-actuated DN1800 plunger valve, DN2000 and DN2400 VAG butterfly valves, and DN2000/DN2400 Flow-Tronic Torpee electromagnetic insertion flowmeters — complete with testing and commissioning for reliable system operation.

up to DN2400 **AUMA · VAG** **Flow-Tronic**
LINE SIZE VALVES METERING

CASE STUDY 03

Five-year multi-brand actuator maintenance

Client: Coal-Fired Power Plant

A five-year preventive-maintenance program for electric actuators of all major brands — inspection, diagnostics, calibration, functional testing and condition assessment. This long-term engagement reflects our customer’s trust in Flowtork’s reliability, technical excellence and after-sales support.

5-year **All brands** **Preventive**
PROGRAM ACTUATORS MAINTENANCE

— OUR PEOPLE

One team, end to end

Flowtork is powered by a multidisciplinary team — sales engineers who specify, field crews who install, and a service group that supports you long after handover.

DEPT 01

Sales & Application Engineering

Sizes and specifies the right equipment for your process conditions and prepares clear quotations.

DEPT 03

Instrumentation & Calibration

Configures, calibrates and integrates measurement and control instruments across your lines.

DEPT 02

Projects & Field Services

Mechanical and electrical crews who handle mounting, installation, alignment and commissioning on site.

DEPT 04

After-Sales & Spares

Genuine spare parts, troubleshooting, preventive maintenance and operator training.

End-to-end

One team — specify, supply, install, commission & support

Certified

Factory-trained by the principals we represent

Nationwide

Field crews mobilised across the Philippines

— WHERE WE WORK

Our home base

A single base in Metro Manila keeps sales, engineering and administration under one roof — for fast response and short lead times.

HEAD OFFICE

Mandaluyong City headquarters — sales, engineering and administration under one roof.

Local stock, local support

Keeping equipment and genuine spare parts on hand in Metro Manila means we respond quickly — supplying, servicing and dispatching crews without waiting on long import lead times.

— QUALITY • SAFETY • COMPLIANCE

Built in, not bolted on

Quality and safety are built into how we work — from factory-backed products to crews trained to operate safely on live industrial sites.

Quality assurance

We supply only genuine, factory-warranted equipment from our principals, and verify selection against your specified duty before delivery.

Health & safety

Our field crews follow site safety protocols and PPE standards on every installation — safety first, every job.

Traceability & support

Documented commissioning, calibration records and genuine spares keep your equipment auditable and serviceable for its full life.

ACCREDITATIONS & REGISTRATIONS

— WHY FLOWTORK

Six reasons clients stay

What two decades of supplying, installing and supporting flow-critical equipment across the Philippines comes down to.

01

Twenty years, one track record

A two-decade reputation built on world-class products, reliable service and on-time delivery across Philippine industry.

02

Eleven global principals

Authorized distributor and service partner for eleven leading manufacturers — genuine products, factory-backed.

03

Engineered to your duty

We don't just sell boxes. Our engineers size and select to your exact media, pressure and process conditions.

04

Install & commission in-house

Our own mechanical, electrical and instrumentation crews mount, align, commission and calibrate on site.

05

After-sales that lasts

Genuine spares, troubleshooting and operator training — we stay on long after the order ships.

06

Filipino-owned & accountable

A local team you can reach, on the ground, answerable for the equipment running your operation.

— WHO WE CATER FOR

Serving industry for over two decades

For 20+ years Flowtork has supplied and serviced equipment across the Philippines' most demanding sectors. If yours isn't listed, leave us an inquiry — we'll find out how we can help.

- Water
- Power
- Oil
- Gas
- Mining
- HVAC
- Sugar / Ethanol
- Food & Beverage
- Pharmaceutical
- Pulp & Paper
- Petrochemical
- Ship Building

Flow-critical, mission-critical

From municipal water networks to power-plant coal feeders and offshore LNG transfer, our equipment runs where failure is not an option — specified for the exact duty, media and pressure of your line.

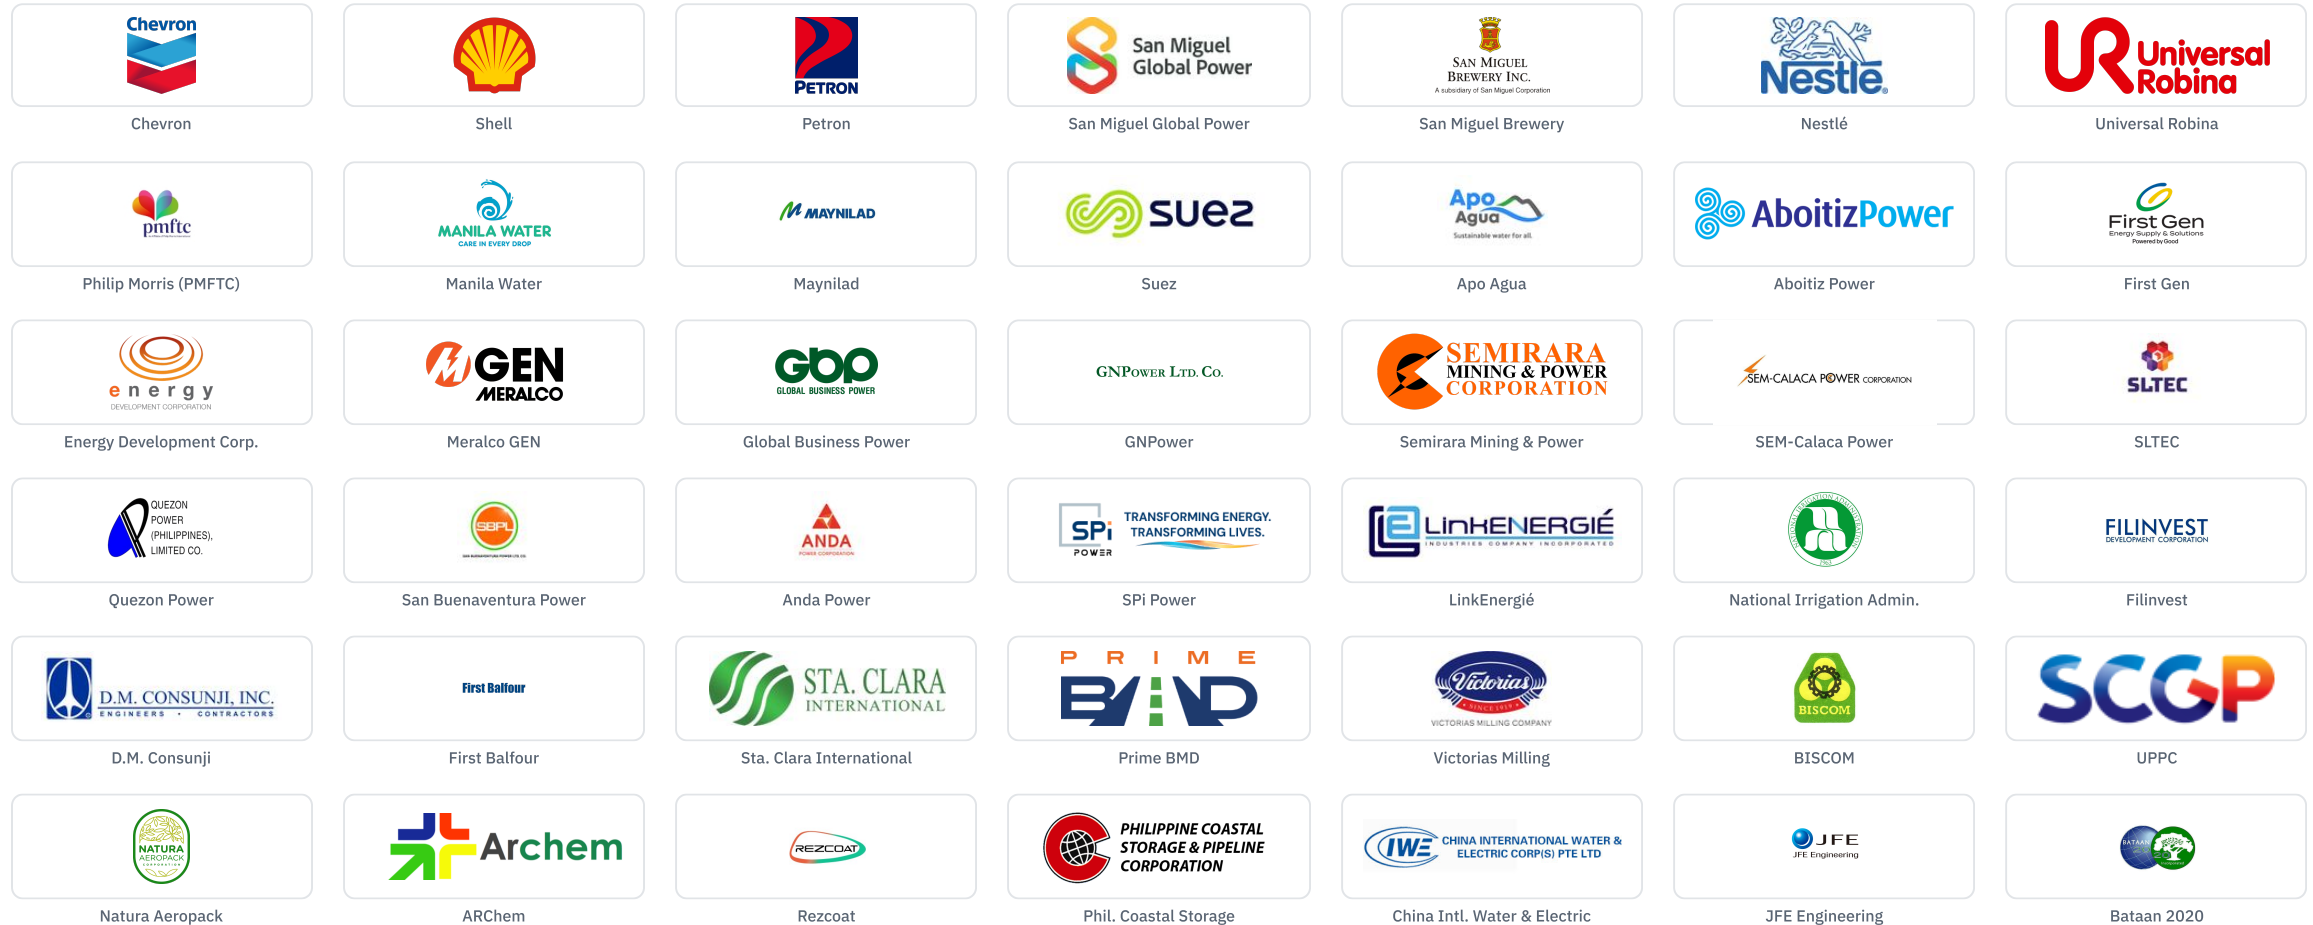

Local team, global products

World-leading manufacturers, backed by a Filipino engineering team that sizes, installs, calibrates and maintains on the ground — with genuine spares and responsive after-sales support.

— OUR CLIENTS

Trusted by leading Philippine operators

A selection of the utilities, power producers and process plants we supply and service across the country.

GET IN TOUCH

Let's keep your operation flowing.

Reach out to discuss an equipment requirement, a servicing need, or a project we can support. We typically reply within one business day.
